

# Strom Plumbing

*Your source for superior quality products  
for the bath & kitchen*

Catalog No. 1901

BY  
Sign of  the Crab

Welcome to Sign of the Crab.

We want to extend our deepest appreciation and gratitude to our wonderful customers for helping us achieve a remarkable business goal, over 45 years of service! Founded on quality, integrity and honesty, Strom Plumbing has continued to push the boundaries of excellence and innovation to deliver impeccable, unique plumbing.

Our Strom faucet name means “stream or river” in Norwegian. In keeping with tradition, you’ll notice that the beautiful rivers of the world are represented in our faucets’ names, and our tubs are named after a variety of the exquisite lakes worldwide.

In a rapidly changing environment, it is important to anticipate the road ahead. Constant and never-ending improvement is key and that is why innovation is at the core of our business – it is who we are. The response to our IAPMO-approved thermostatic faucets has been overwhelmingly extraordinary and has cemented us in a position as industry leaders of this technology. Our ideas have been noticed, and of course, imitated, but we encourage you to accept no substitutes; our originals are the best!

Since 1972, our customers have placed their trust in us. We have done our utmost to keep our quality high and to keep our pledge to you: **We will continue to search the world for the highest quality products and the best people to serve you.**

## • **Faucet Construction**

Each item is individually assembled and tested in the United States. Our faucets are constructed with high quality, low lead brass. Our lavatory & kitchen faucets are lead free per California AB1953. They meet all current regulations with regard to lead composition.

## • **Tubs**

Most of our cast iron tubs are IAPMO approved. Our tub legs are constructed of solid brass with chrome or nickel plating or with our electrostatically applied Supercoat or Oil Rubbed Bronze finish added. Our white and black tub legs are constructed of cast iron with premium paint added. All of our tubs include adhesive nonslip strips for the consumer to install if required. We only ship tubs & sinks (LTL Shipments) to the contiguous USA.

## • **Valve Types**

All faucets will be shipped with 1/4 turn ceramic valves. Our 1/4 turn ceramic cartridge uses 2 ceramic disks that rotate to open and close the valve, minimizing mechanical wear. Thermostatic valves control the constant output temperature of the faucet.

## • **CALGreen Compliant**

Products displaying this green crab symbol meet all requirements for the CALGreen code 4303.1.3.2

• Products displaying this symbol are not for sale in California.

## **Tub Warranty**

Our tubs are warranted to be free of manufacturing and finish defects for a period of 5 years from date of purchase, when properly installed by a qualified, licensed plumber. In most cases on-site repair of the tub will be accomplished, minimizing the inconvenience to the customer. Most of our Cast Iron tubs are IAPMO approved.

## **Faucet & Accessory Warranty**

All items are warranted to be free of manufacturing and finish defects for a period of **5 years** from date of purchase, when properly installed by a qualified, licensed plumber. For items other than sinks & tubs, this warranty covers replacement of defective parts, not of complete product, unless deemed necessary by a customer service representative. The warranty does not extend to labor charges or air freight charges when repair or replacement of the item is needed. The warranty only applies to interior installations. Our products are not warranted for outdoor use.

Effective as of 2015, we now offer a **Limited Lifetime Warranty on our cartridges** for all of our faucets, for as long as the original purchaser owns the unit. We will provide new cartridges as deemed necessary by our Customer Service Department to the original owner only with provided proof of purchase.

All our **ceramic faucet handles** are warranted for 5 years from date of purchase. Any ceramic faucet handle developing cracks or chips will be promptly replaced, as a cracked or broken handle may result in personal injury.

Our **Finishes** include Chrome, Matte Nickel, Polished Nickel, Supercoat Brass, Oil Rubbed Bronze, Satin Black, Unlacquered Brass, Unlacquered Satin Brass & Unlacquered Raw Brass. The Nickel Finishes and the Unlacquered Brass finishes are “living finishes”

and will patina with time. Chrome & Nickel finishes are warranted against defect for a period of 5 years. The Oil Rubbed Bronze & Satin Black finishes are “non-living” fragile finishes that must be inspected prior to installation and are not warranted further. The Unlacquered Brass finishes carry no finish warranty. See our Supercoat Brass finish warranty and proper cleaning instructions below.

## **Lifetime Supercoat Brass Warranty**

Our Supercoating is a 2 part epoxy, applied electrostatically, and baked on our brass products to insure a lasting shine. It is absolutely guaranteed for as long as the original purchaser owns their home and proper maintenance instructions are followed. The product must be returned to our factory for re-coating. We will re-coat, not replace the product if a defect of the Supercoat finish occurs.

**Care of Supercoat Brass** - Supercoat brass items should be wiped gently with a soft cloth after each use. Plumber's putty should not be used for installation. Use of plumber's putty, detergents or abrasive cleaners will void the warranty of the finish as they may cause deterioration of the coating. We recommend a bead of waterproof silicone where putty is needed.

## **Installation Instructions**

Installation instructions are included with every faucet and are also available on our website at [www.signofthecrab.com](http://www.signofthecrab.com).

## **Price Changes**

Prices and products are subject to change without notice. Unless price is protected in writing, shipment will be at prevailing prices.

**We only sell wholesale to qualifying trade accounts.**

Every faucet that ships from our warehouse is hand assembled and tested in our facility located in California. This allows us to not only provide you with a superior quality product, but also allows us to CUSTOMIZE the item to meet the customer specifications. Most of our Strom products are now available in the below SPECIAL ORDER finishes. We do not offer a finish warranty on these finishes. Call a representative for pricing.

## UNLACQUERED BRASS

**Unlacquered  
Polished Brass**

**Unlacquered  
Satin Brass**

**Unlacquered  
Raw Brass**

**Classic, timeless unlacquered brass will patina and age with time.**

## SATIN BLACK

**Our satin black finish is a one shade black finish that is electrostatically applied, and then baked for durability.**

## CUSTOM

**While we are hand assembling your unit, we can mix and match parts and finishes to bring your custom requests to life.**

# Thermostatic Control Valve Options

## Thermostatic Control Valve

– (Includes the valve, faceplate & handle trim)

This thermostatic valve remains within 1 degree Fahrenheit of your desired setting and includes a manual override that allows the user to adjust the temperature as needed. **Must be used in conjunction with a control valve or diverter valve option.**

**P0920C**

Includes: Thermostatic Control Valve, Faceplate & Handle Trim

**P0921C**

Includes: Thermostatic Control Valve, Faceplate & Handle Trim

**P0922C**

Includes: Thermostatic Control Valve, Faceplate & Handle Trim

**P1040C**

Includes: Thermostatic Control Valve, Faceplate & Handle Trim

**P1041C**

Includes: Thermostatic Control Valve, Faceplate & Handle Trim

**P0925C**

Includes: Thermostatic Control Valve, Faceplate & Handle Trim

**P0966C**

Includes: Thermostatic Control Valve, Faceplate & Handle Trim

## Diverter Valve with Stops (for 2 or 3 Devices)

*(Includes the valve & trim as shown)*

This Diverter controls the on/off of an outlet by redirecting the water flow to a single device only. It does not control the volume of the water flow. A plug is provided when using as a 2 device system only. **Use it with our Thermostatic Valve options and other components**

This unit is CALGreen compliant

Diverter valve included with each Trim Option

Volume Control Valve Included with each Volume Control Trim Option

## Volume Control Valve

*(Includes the valve & trim as shown)*

This volume control valve controls the on/off and volume function of ONE outlet source only. This volume control valve is required for every outlet source (ie: spout, hand shower, shower head) and allows water to flow from each source at the same time (as water pressure permits)

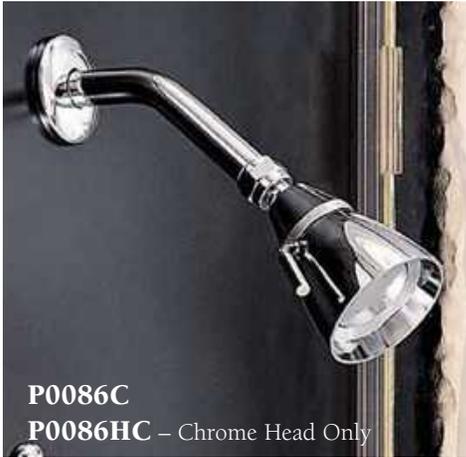

**Note:** Where code restricts the use of multiple controls, then use our 2-3-way diverter valve

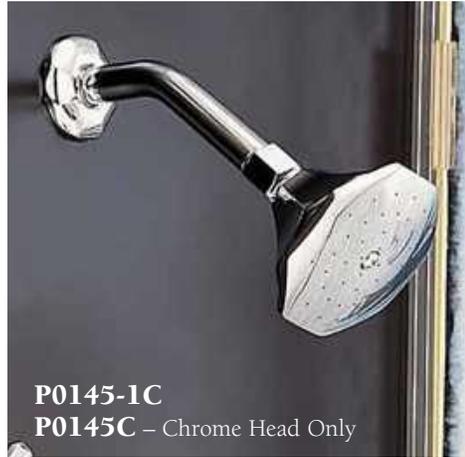

**P0942** – Plain Metal Buttons are available, see price list for Finish options  
**P0943** – Thermostatic Valve Extension Kit, see price list for Finish options

**P0955** – BLANK  
**P0955H** – HOT  
**P0955C** – COLD
